

# WEEK TWO – TASK

## TASK - FIELDWORK

Choose one of the areas that you've identified as needing new knowledge or skills and do one (or all) of the following:

- Hold a conversation with someone new to you;
- Undertake deep reading or research to expand your thinking;
- Talk to a peer working in a similar sector to expand your understanding – they could be someone from your organisation or a person you haven't worked with who you admire and you think may have some useful reflections to share.

## PROMPTS:

- Note down what changes as a result of this conversation, listening or reading to the insights you were mapping out in the earlier mapping task.
- Notice what is difficult and what starts to change your perspective on your question.
- Where else might this lead you – what new doors does this open up?
- Also notice what challenges you begin to face and get ready to share those with others – to see what might be the ways to overcome some of those barriers.
